

DECO'O

CONCENTRATED VEGETABLE RELEASE OIL

la marque
du bâtiment

1. PRESENTATION

DECO'O is a vegetable release oil, dilutable with water, which has three functions: form removal, protection and simplified maintenance.

2. ADVANTAGES

- **Suitable for all types of moulds, formwork or form panels.**
- **Very economical to use with significant dilution.**
- Milky white emulsion when diluted with water: visible application of the product.
- **Forms a greasy, continuous film** immediately after application.
- Leaves no residues on the substrate after form removal, which could prevent subsequent adhesion of paint, plaster, coatings, etc.
- Exclusively made of natural products.
- **100% biodegradable.**
- Contains no petroleum derivatives, no toxic products, no paraffin, no wax, no alcohols.
- **Non-toxic for the applicator and the environment.**

3. AREAS OF APPLICATION

DECO'O presents no danger or particular disadvantage, no matter which application method is used:

- On worksite: Especially recommended for formed concrete (bakelite or non-bakelite wood, metal, polyester) because of its lack of solvent and mineral oil.
- Prefabrication: recommended as a substitute for conventional emulsions when the concrete requires subsequent sanding or increased acidity due to the absence of dusting, even in case of excess.

DECO'O is used by construction companies, public works, concrete mixing plants (mixer truck, concrete mixers, truck skip, protection of windows, props, scaffolding, etc.).

4. INSTRUCTIONS

Substrate preparation:

Substrates must be sound, dry and clean.

- Remove Laitances using **DECAP CIM SF** or **DECAP BIO**.
Traces of oil and grease using **NETT EURO KLINE**.
Loose particles (scraping), dust (brushing).

Implementation:

DECO'O is applied using a brush, spray or other means of application (motor pump, etc.).

Apply **DECO'O** evenly and in sufficient quantity, from bottom to top.

Precautions:

Consider reducing the rate of dilution by 50% in case of high moisture in the air or on the substrates.

DECO'O

CONCENTRATED VEGETABLE RELEASE OIL

la marque
du bâtiment

Application:

- Application temperature** : Between +5°C and +35°C
- Application equipment** : Brush, roller, spray (blue nozzle), motor pump
- Dilution** : Metal formwork: 1 L of **DECO'O** for 5 L of water
Wooden formwork: 1 L of **DECO'O** for 10 L of water
- Cleaning of the equipment** : Water

5. CHARACTERISTICS

- Appearance** : Concentrate: Translucent, straw-coloured oily liquid
Ready to use: White milky emulsion
- Density** : 0.92 ±0.05 g.cm⁻³
- Yield** : 20 m²/L of ready to use product depending on the porosity of the substrate
I.e 100 to 200 m²/L of concentrate
- Shelf life** : 1 year in its unopened original packaging

(For more information, please refer to paragraph 9 of the safety data sheet).

6. SAFETY OF USE

- See the product's Safety Data Sheet at www.quickfds.fr.
- Store away from frost.
- Do not apply during periods of rain or in threatening weather.
- Do not apply on frozen substrates.

The details provided in this Data Sheet are given in good faith, for information purposes only. They shall not in any case constitute a guarantee on our part, or engage our responsibility when using our products. This Data Sheet supersedes all previous versions. Compagnie France Chimie reserves the right to make changes to its products and to this data sheet without prior notice. Our clients shall ensure, before any implementation, that these instructions have not been replaced by a more recent version that takes into account new technical data.

Product solely intended for professional use.
